Richmond Regional Heirs' Property Study

Locality Fact Sheet: Colonial Heights

Analysis by HDAdvisors in support of the Richmond Heirs Property Network, 2026.

This sheet summarizes the heirs' property indicators found across Colonial Heights's parcels, read from public records. The result is a regional screen identifying parcels with an elevated risk of being an heirs' property, not a legal determination of title. The numbers below show how many parcels were flagged, how they compare to the rest of the local parcel stock, and where in Colonial Heights they cluster.

FLAGGED PARCELS	SHARE OF PARCEL STOCK	CONFIDENCE TIERS	CLUSTER TRACTS
317	**4.12%**	**85 / 232**	**2 hot / 0 cold**
of 7,695 parcels	study area 2.12%	high confidence / likely	of 5 census tracts

Ownership Signals

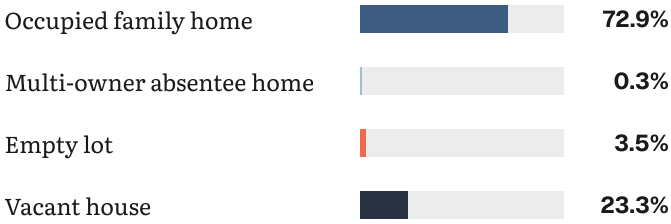

Share of flagged parcels carrying each signal

Selected signals are shown. Parcels can carry more than one signal, so percentages do not sum to 100%.

Property Type Mix

Share of flagged parcels by type

Vacancy is the share of parcels with a known USPS vacancy status. Parcels with no status on record are excluded from the denominator.

Property types are groupings of statistically similar parcels. No single trait defines membership.

Hot- and cold-cluster tracts have flagged-parcel rates statistically above or below the regional pattern. Tracts with fewer than 5 heirs-flagged parcels or fewer than 100 total parcels are not assigned a rate class. 0 of 5 tracts here are below that threshold.

High confidence indicates stronger, converging heirs' property evidence. Likely indicates meaningful but less conclusive evidence. Both are classifications, not legal determinations of heirs' property status.
